THE COMPANY

About us

A Venezuelan company founded in Puerto La Cruz, Anzoátegui State, on January 24, 2003. We supply equipment, spare parts and services to the oil, gas and petrochemical industry, with nationwide coverage from our offices in Puerto La Cruz and Maracaibo.

Mission

To make services simple, convenient and reliable.

Vision

To provide solutions that enable integration, control, adaptability, interoperability, reliability and convenience for anyone seeking to compete and create added value.

2003	+300	2	10
Year founded	Contracts completed	Offices in Venezuela	In-house technicians

Main clients

PDVSA · PDVSA Gas · BARIVEN · Chevron · Repsol · Pequiven

OUR VALUES Sustainable performance · Innovation at the service of the client · Health, safety and environmental responsibility · Personal and professional competence · Transparency and communication · Confidentiality · Integrity

OUR SERVICES

More than supplies: technical and logistics support

Process units

We are able to supply complete equipment packages for industrial process units, integrating specialized manufacturers according to the requirements of each project.

Parts

Efficient sourcing of quotations, ensuring a clear understanding of each part’s use, updated specifications for legacy equipment and safe application of the replacement. We verify alternatives in consultation with the client and locate hard-to-find parts across international specification systems.

Spare parts for equipment and systems

We guarantee spare-parts availability and locate parts for obsolete equipment through our logistics network with manufacturers and stocking centers.

Nationwide coverage · In-house technical team and after-sales service · Logistics network with manufacturers and stocking centers

INDUSTRIAL SUPPLIES

Oil absorbents and chemical products

Oil absorbents

Oleophilic absorbents in rolls, pads, pillows, granules and containment or sweep booms for cleaning up hydrocarbon spills. Formats for every type and size of spill.

Chemical products

Chemicals for the oil and petrochemical industry: detection of oil traces in spills, refinery process control, refining catalysts and polymers for fibers and resins. Spill control kits.

INDUSTRIAL SUPPLIES

Flame-resistant coveralls and safety gloves

Flame-resistant coveralls

Made by D&V in Venezuela with 4.5 oz Nomex® IIIA and blended fabrics, with reflective tape, to the standards required by PDVSA. Colors and sizes to customer requirements.

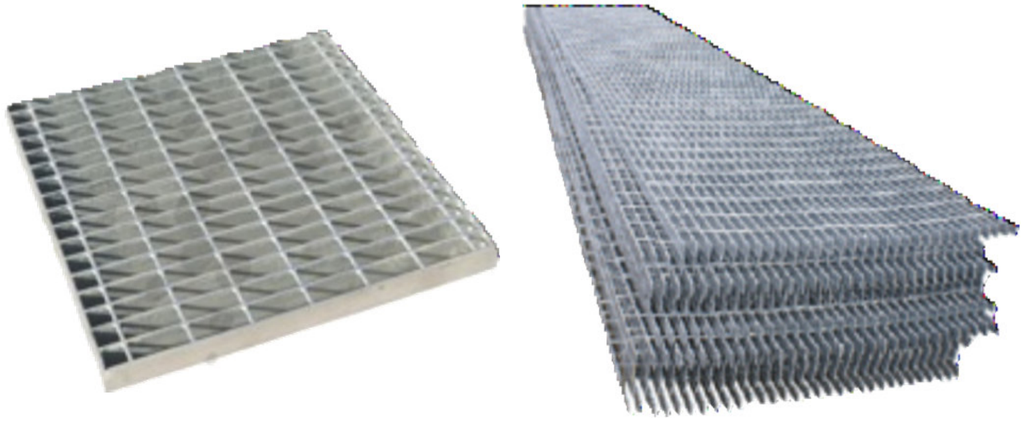

Safety gloves

A wide range of safety gloves: split leather, neoprene, cotton, latex, nitrile and more. As both distributors and manufacturers, we cover the day-to-day needs of industrial workers.

INDUSTRIAL SUPPLIES

Grating and air conditioning

Steel grating

Manufactured to ANSI/NAAMM MBG 531 and MBG 532 standards. Built from load-bearing bars with twisted square cross bars as the binding element. Available in plain and serrated (anti-slip) versions.

Air conditioning

Supply of air conditioning systems for large-scale projects and specific applications, from split units to central systems for process areas and offices.

INDUSTRIAL SUPPLIES

Transformers and variable frequency drives

Transformers

Backed by direct manufacturers, we supply any type of transformer: single-phase pole-mounted (conventional and self-protected), three-phase pole-mounted, pad-mounted (single- and three-phase), substation, dry-type and special units.

Variable frequency drives

Industrial regulators installed between the power supply and the motor: they adjust frequency and voltage to the process requirements, with soft starting and energy savings. Panels built to suit each application.

INDUSTRIAL SUPPLIES

Pumps and valves

Pumps

A wide variety of pumps for the oil and petrochemical industry: centrifugal, vertical and horizontal, progressing cavity, gear and positive displacement pumps, together with their original spare parts.

Valves

A broad range of state-of-the-art, top-quality valves for fluid processing: gate, globe, ball, check and control valves, for virtually any industry and application.

INDUSTRIAL SUPPLIES

Wellheads and air & gas compressors

Production wellheads

Surface assemblies that secure the Christmas tree to the wellhead and allow production to be controlled safely. We supply wellheads, spools, flanges and accessories.

Air and gas compressors

A full line of compressor packages, mechanical drives and generators: agile, affordable solutions that turn clean-burning natural gas into sustainable, profitable energy.

INDUSTRIAL SUPPLIES

Drill pipe, casing, tubing and rod pumping

Drill pipe, casing and tubing

We supply our clients with all the tubulars needed for drilling and well completion: drill pipe, casing and production tubing, in API grades and connections.

Sucker rod pumping

The most common artificial lift method, used to produce crude from low- and medium-volume wells and especially for medium and heavy oils. Pumping units, downhole pumps and accessories.

INDUSTRIAL SUPPLIES

Progressing cavity pumps and electric submersible pumping

Progressing cavity pumps (PCP)

Positive-displacement progressing cavity pumping is one of the most widely used artificial lift methods in the oil industry: highly versatile and efficient at low cost. Pumps, drive heads and spare parts.

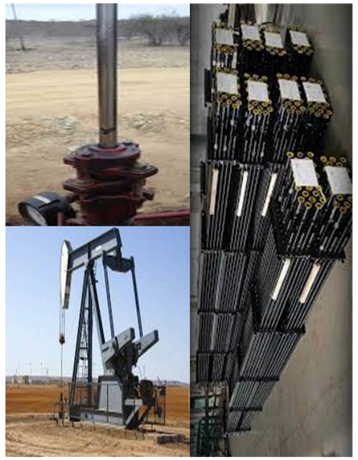

Electric submersible pumping (ESP)

An artificial lift system based on a downhole multistage centrifugal pump driven by a submersible electric motor, powered by cable from the surface. Equipment, flat cable and spare parts.

INDUSTRIAL SUPPLIES

Completion equipment, instrumentation and control

Pumping and completion equipment

A wide range of supplies for completing pumping wells: gas anchors, torque anchors, sucker rods, crossovers, seating nipples, polished rods, tubing, bushings, flat cable and production tubing.

Instrumentation and control

Instruments to measure, control and monitor every element of an industrial system with precision, and to automate its processes: transmitters, controllers, flow meters, recorders and control valves.

INDUSTRIAL SUPPLIES

Mechanical seals and pressure gauges

Mechanical seals

Dynamic sealing elements that close the leak path between two parts moving relative to each other. Component and cartridge seals for pumps, compressors and agitators.

Pressure gauges

Analog and digital indicators for measuring the pressure of gases and liquids such as water, oil or air. Process, glycerin-filled, differential and test gauges, in the ranges and connections required.

INDUSTRIAL SUPPLIES

Industrial electrical installations and filters

Industrial electrical installations

The set of equipment that makes up the electrical circuits needed to transform, control and distribute power in industry: panels, cables, electrical consumables and line stringing.

Filters

Multi-stage filtration systems that remove unwanted material from industrial processes and applications: air, oil, fuel and water filter elements, together with their housings.

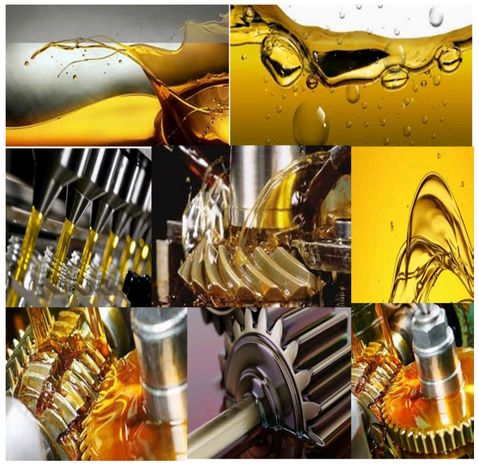

INDUSTRIAL SUPPLIES

Tools, hardware and lubricants

Tools and hardware

Top-quality tools and hardware consumables for the development and continuity of everyday industrial work: cutting discs, welding electrodes, abrasives, tapes, padlocks, chains and more.

Lubricants

Substances placed between two parts in contact to prevent wear and degradation when they move: hydraulic and gear oils, greases and specialty lubricants.

INDUSTRIAL SUPPLIES

UPS, battery banks and radio modems

UPS, battery banks and chargers

Uninterruptible power systems (UPS) of 5, 20, 22.5 and 100 kVA, battery banks and chargers for backing up critical installations: control rooms, instrumentation and telecommunications.

SATELLINE-EASy radio modems

SATEL SATELLINE-EASy UHF radio modems for telemetry and field data communication (SCADA), with two operating voltage levels and low power consumption.

INDUSTRIAL SUPPLIES

Gas detectors and Barton recorders

Gas detectors

A variety of portable single-gas and multi-gas detectors to protect personnel in process areas: CO, H2S, NH3, O2 and combustible gases (LEL), with audible, visual and vibrating alarms.

Barton recorders

Barton circular chart recorders for temperature and pressure, for continuous process monitoring in the field, together with their charts, pens and spare parts.

OFFICE CONSUMABLES

Printing and office consumables

Printing consumables

Toner, ink cartridges, ribbons, UV inks and paper for the leading brands of printers and office equipment. Premium-quality consumables developed under strict standards and quality controls.

Focused on quality

All our consumables are geared toward the quality, excellence and reliability needed to meet our clients' expectations.

- Original and compatible toner and cartridges
- Ribbons for dot-matrix and point-of-sale printers
- UV and sublimation inks for large-format printing
- Paper, reams and general office supplies
- Delivery to offices and plants nationwide
